

Nature Mapping JH Job Description

Summary Description

Nature Mapping Jackson Hole (NMJH) collects data through casual observations. There is no set routine, only basic wildlife watching. This is very valuable data for Jackson Hole Wildlife Foundation along with many of our partners including Wyoming Game & Fish. Volunteers can make casual observations while hiking, biking, camping, boating, driving, and other daily activities. This is a great opportunity to engage citizens in long-term wildlife data collection.

Time Commitment

Volunteers can Nature Map at their convenience, so the timing is based upon the volunteer's schedule. The beauty of Nature Mapping is that it can be done anytime and on any day.

Progression

Nature Mapping Jackson Hole is a general volunteer position without a hierarchy of service. However, there are opportunities for continuing education through different classes, presentations, workshops, and more!

Job Duties

- Accurately record wildlife sightings within at least a week of the sighting
- Provide photos for wildlife verification if necessary
- Enter data into the NMJH app or website as directed

Qualification and Skills

- Open to anyone who loves to observe wildlife
- Patience while observing wildlife to note behavior(s)
- Must attend a NMJH training
- Must have a working electronic device (phone, tablet, computer, etc.) or access to a computer to input data

Expectations

- Nature Mappers should enter their observations within a week of a sighting
- Communicate with the NMJH Program Coordinator about unusual sightings ASAP
